

Field Safety Specialist

For a utility design-build construction company
In Benicia, California

Job Description

Are you self-motivated, energetic and looking for an opportunity in the field of safety? Do you want to further develop your skills and experience in teamwork and leadership? Join our team and experience all that Charge has to offer!

This is an exciting time to come on board. We're growing at a fast pace and able to provide ample opportunity for career growth and development. We have earned our reputation as a leader in design, procurement and construction services for the underground utility industry and pride ourselves on our safety culture, which emphasizes integrity, compassion and employee empowerment.

Field Safety Specialists provide safety leadership to ensure compliance with corporate and industry safety standards, implement safety directives, assist with training program, improve safety performance, and ensure safety policies and procedures are aligned with governmental regulations.

Responsibilities

- Perform safety and equipment audits, as well as yard inspections, to identify/correct potential hazards and ensure safety regulation compliance. Includes company equipment, vehicles, facilities, job sites, and safety equipment.
- Provide a detailed written description of all job site visits.
- Maintain an exemplary example of driving safety.
- Provide technical advice, coaching, guidance, and mentoring to employees on safety initiatives and necessary corrective actions.
- Assist in job site accident, near-miss and occupational injury investigations to determine probable root causes and make recommendations for corrective action.
- Assist in employee safety programs to determine adequacy including input on short and long-term strategic safety planning and development.
- Identify best practices and assist in continuous improvement initiatives to reduce work process errors (WPE), raise safety awareness, and improve safe work practices.
- Cultivate a work environment that supports our safety culture.
- Daily employee interface.

- Ability to travel daily for an undetermined amount of time and mileage
- Participate in the development of and strategic vision and establishment of processes for the safety program.
- 40+ hours per week, which may include nights and weekends

Skills & Experience

- High school diploma or associates degree related construction safety
- Three (3) years of experience in underground utility electric and gas distribution construction safety
- Complete OSHA 10 General Construction
- Possess and demonstrate a working knowledge of incident investigation and reporting
- Promote a coaching based safety behavior
- Encourage collaborative solution resolution
- Prioritizes workload independently based on department priorities and goals
- Proficiency with Microsoft Office applications (Word, Excel, PowerPoint, and Outlook)

Desired Qualifications

- Complete OSHA 30 General Construction
- Complete OSHA-7505: Introduction to Incident (Accident) Investigation
- Knowledge of underground utility electric and gas distribution construction
- Experience in construction safety, reporting, and record/document control
- Ability to work effectively individually and in a collaborative environment
- Analytical and critical thinking skills
- Ability to speak and write clearly, concisely, and directly
