

Elizabeth Tan

Managerial Economics Major
University of California, Davis
Internship: Accounting

What brought you to Charge? How did you see it fit into your professional goals?

I met Charge at a career fair and gave them my resume. A member of the HR team reached out to me after a phone screening. I thought the internship would help me learn more about accounting. One of my short-term goals is to earn my CPA license, and the hands-on experience here will translate to more knowledge in preparation for my CPA exams.

What was your onboarding process like?

The onboarding process was great. I was able to meet a lot of different people from various departments in the company.

Can you describe a project you are working on?

One project I am working on is helping the Accounting GL teams figure out the Charge Cares entries and helping have them reflect to Vista.

What is something you admire about Charge, as well as your internship so far?

I admire the way everyone seems to know and care about each other. It is apparent that everyone is open here and genuinely wants to get to know one another. The care can be seen in how the executive team initiated the open-door policy.

What skill(s) do you hope to improve upon over your internship period?

I hope to learn many more soft skills. I need to learn how to interact with others in the workplace. Gaining these skills will help me learn more about the accounting field. Beyond that, I hope to learn more about accounting software and accounting practices.

What is next after your internship is over?

I plan to go back home to the Bay Area. I want to regroup and create a post-graduation plan. In the short term, I hope to start studying for my CPA exams, so that I can pass the tests. I also want to figure out where I will live and work next.
